

Visitor log for the Oregon State Arthropod Collection, January-December, 2018.

The Oregon State Arthropod Collection is generally open for research-related visits during the normal business hours of Oregon State University. Numerous non-research visits are also scheduled throughout the year. The collection strives to record this usage of the collection in our visitor log, a physical sign-in book located near the entrance of the collection. The table below records those entries for the 2018 calendar year, although a few illegible entries were necessarily omitted. A scanned pdf of the pages themselves may be added at a later date and if so, will be added as a 'supplemental file' to this publication.

Visitors wishing to cite their visit to the collection in scholarly work may do so using the following citation:

Oregon State Arthropod Collection. 2019. Visitor log. January-December, 2018. Catalog: Oregon State Arthropod Collection 3(1). pp 7-9. http://dx.doi.org/10.5399/osu/cat_osac.3.1.4563
